# Karol Rogalski

## Junior Front-end Developer

Motivated and detail-oriented Junior Frontend Developer with a passion for creating exceptional user experiences. Proficient in HTML, CSS, JavaScript, and ReactJS, I have a strong understanding of responsive design principles. Experienced in reproducing complex design mockups with pixel-perfect precision, I am a collaborative team player with excellent attention to detail and a commitment to delivering high-quality code. Seeking a supportive environment to apply and expand my skills as a Frontend Developer, while continuing to contribute my expertise and grow in a dynamic and collaborative setting.

## Projects

### E-commerce store

Designed and developed a fully functional ecommerce platform, incorporating secure payment gateways, inventory management systems, and an engaging user interface. Demonstrated ability to deliver seamless customer experiences

### OpenAI chatbot

As part of a project, I developed a chatbot using OpenAI's advanced natural language processing technology. Leveraging machine learning algorithms, I programmed the chatbot to understand and respond to user inquiries, providing personalized and accurate information. This project showcased my proficiency in natural language processing and AI technologies, highlighting my ability to create intelligent conversational agents that enhance user experiences.

### SinglPage website

I successfully completed a website development project that showcased my ability to reproduce designs with pixel-perfect precision. Employing meticulous attention to detail, I accurately translated design mockups into a fully functional website, ensuring that every element, layout, and typography was faithful to the original design. This project highlighted my proficiency in front-end development, HTML, CSS, and my commitment to delivering visually flawless websites that meet the highest standards of design integrity.
